Prices include fitting (when carried out as part of a service)

Other parts/prices also available, please enquire.

Booking Details & Info:

The best way is to [Contact me](#) to book your Technics turntables in for a service, or message me through the [Facebook Page](#)

Please state if there are any additional faults you want looking at when booking for a service. Do mention if a fault is intermittent, or develops after the turntable has been switched on for a while.

A note about aftermarket modifications:

Please note that when a request has been made to modify, e.g. fit different coloured LEDs (which are different to that of the original design). No responsibility can be accepted for any customisations/modifications in any way shape or form especially if the colour seems a different shade than expected, or is brighter than expected etc. Normal parts & labour charges will apply if requested to change back to original specification.

Payment:

If sending by courier, payment would be via bank transfer.

If bringing the turntables in person, payment can be made in cash. I currently do not accept credit/debit cards directly (although you can use paypal for this). You can also pay before collection via bank transfer. Note that if paying by bank transfer, you may need to pre-approve this with your bank (as new payee).

In either case please note that turntables cannot be released until cleared payment has been received. I do not accept cheques.
